ABOUT PARIVESH

PARIVESH, has a spark of e-governance, ignited by Hon'ble Prime Minister Shri Narendra Modi in August 2018. It is a Single-Window Integrated Environmental Management portal, developed in pursuance of the spirit of 'Digital India' and capturing the essence of Minimum Government and Maximum Governance.

To provide a seamless experience across all major clearance, the New Version-**PARIVESH 2.0** has been completely automated with modern technologies to further increase its efficiency and decision making without compromising on the environmental rigors.

The Three Key Drivers

1. Process Transformation: Transforming the way existing activities and processes are carried out to ensure more authenticity, integrity of the data and enhanced level of digitalization. A significant number of existing offline /manual processes are to be made online in PARIVESH platform. Decision making shall be focused and more data driven.

2. Technological Transformation: Developing and designing of PARIVESH with modern day web application technology stack, implementing provision for data analytics, leveraging emerging technology to enhance more focus on data and user, utilizing GIS extensively etc. It would be built on the latest technologies. Future-ready, scalable and functionally sustainable with emphasis on security while retaining the ease of information sharing.

3. Domain Knowledge Intervention: The PARIVESH platform shall be managed by technology experts, domain experts, management experts in Clearance and Compliance monitoring.

The key objectives of PARIVESH

I. Single Source of Truth: One source point of authentic data pertaining to clearance and compliance.

II. Effectiveness through Process & Data Synchronization: Process, Data and Stakeholders, all in sync on a single platform leading to effective and expeditious process completion.

III. Transparent & Informed Decision Making: Increased emphasis on data analytics driving a culture of data-driven decision making. Also, enhanced process/data on boarding would ensure significantly high level of data traceability and audit trail leading to a compliant system.

IV. Minimum Government Maximum Governance: Minimizing human intervention with process automation and pre-defined policy/SOP/process flows.

V. Better Compliance Monitoring: Focus on robust online compliance reporting and monitoring, including online submission of environmental reports, automated site visit reports, timely alerts and a comprehensive compliance profile.

MODULES & BENEFITS

KYA
Transparent facilitation of clearances needed.

Registration with KYC
Proponent authentication and validation through government databases.

Common Application Form
Reduces users repetitive efforts across all applicable clearances.

DSS
Validation of project site and data trend analysis providing rule-based evaluation for effective and informed decision making.

Clearance Management
An optimized clearance management module having a decision support system (interface).

CAMPA Management and Payment Gateway
Automated payments with minimum intervention.

Helpdesk and SMS Alerts
Faster query processing and closure.

Track Your Proposal
Real time monitoring of status of clearance application.

Consultant Management
Task and Performance management system designed specifically for consultants.

Communication Management
Automated alerts via emails, SMS and a dashboard will ensure prompt action by stakeholders.

Compliance Management
Submission and actions on the 6 monthly compliance report.

HIGHLIGHTS

- ✅ Unified Digital Platform for all Green Approvals

- ✅ GIS based know your Approvals and Authorities

- ✅ Common Application Form

- ✅ GIS based Decision Support System

- ✅ Online Compliance Reporting and Monitoring

- ✅ Emerging Technologies based Dashboards

- ✅ Track Your Proposal Real Time

- ✅ Helpdesk and SMS Alerts
